

Course Descriptions Summer 2006

ITK 352: Multimedia Technology Applications

This course provides students with an introduction to multimedia technology. The course takes a practical approach to the design and development of multimedia applications. A variety of emerging web technologies, scripting languages and authoring tools are also examined in the class.

Offered:

MWR 2:35-5:00 PM

Instructor:

Dr. Joaquin Vila Ruiz

Prerequisite:

“C” or better in ITK 261

ITK 368.01, 368.03, 385: Information Assurance Fundamentals

The need to protect critical informational assets is of vital importance to organizations. This course provides a broad view of the field of information assurance/computer security and the managed responses to various threats. Topics include information security technology, risk management, cryptography, and security and people.

Offered:

MWR 12:00-2:25 PM

Instructor:

Dr. Douglas Twitchell

Prerequisite:

“C” or better in ITK 261

Restrictions:

- This course may **NOT** be taken if ITK 368.01, ITK 368.03, or ITK 385 was taken during the Fall 2005 semester.
- This course **MAY** be taken if ITK 374 was taken during the Spring 2006 semester
